PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of experience designing and shipping SaaS platforms, AI-powered applications, and workflow-automation systems. Proficient across the complete stack — from pixel-perfect Next.js/TypeScript frontends to scalable Node.js, PostgreSQL, and Redis backends — with hands-on expertise in agentic LLM pipelines, OpenAI API integrations, BullMQ background queues, and Docker-based CI/CD workflows.

Proven track record delivering production features at healthcare-tech and SaaS companies, working independently and collaborating across cross-functional teams. Passionate about building intelligent, high-impact software and eager to contribute to fast-moving product teams pushing the boundaries of AI-driven automation.

TECHNICAL SKILLS

Frontend:	Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, Shadcn UI, Redux Toolkit, Zustand
Backend:	Node.js, Express.js, REST APIs, Prisma ORM, Mongoose, Sequelize, BullMQ, Cron Jobs
Databases:	PostgreSQL, MongoDB, Redis, SQLite
AI & Automation:	OpenAI APIs, Agentic AI Systems, RAG Pipelines, LLM Integrations, Workflow Automation
Infrastructure:	Docker, CI/CD, GitHub Actions, Background Job Queues
Tools:	Git, GitHub, Postman, VS Code, Figma, Firebase, Appwrite

PROFESSIONAL EXPERIENCE

Product Box

Full Stack Developer · Peshawar, Pakistan · Jan 2025 – Present

- Engineered healthcare staffing and workforce-automation platforms using Next.js, TypeScript, PostgreSQL, and RESTful APIs, streamlining multi-role scheduling and reducing manual effort.
- Architected reusable component systems and frontend design patterns that improved development velocity and long-term codebase maintainability.
- Integrated real-time scheduling, AI-assisted candidate matching, and job-management APIs supporting concurrent multi-role data synchronisation.
- Optimised core Web Vitals through lazy loading, component splitting, and efficient state management, delivering measurable performance gains.
- Collaborated on backend API design, Docker environments, database query tuning, and CI/CD pipelines to ensure consistent, high-quality delivery.

Stack: Next.js · TypeScript · PostgreSQL · Tailwind CSS · Docker · GitHub Actions

Apptex Software Solutions

Full Stack Developer · Peshawar, Pakistan · 2024 – Jan 2025

- Led frontend development of multi-role SaaS applications, delivering consistent, accessible UIs with Next.js, Tailwind CSS, and Shadcn UI.
- Managed complex cross-feature application state with Redux Toolkit, eliminating data-sync bugs across concurrent user workflows.
- Partnered with backend engineers on Node.js APIs and MongoDB/PostgreSQL services, ensuring efficient, scalable data pipelines.

- Applied performance optimisation, accessibility best practices, and modern UX patterns that improved user retention and satisfaction.

Stack: React · Next.js · Redux Toolkit · Node.js · MongoDB · PostgreSQL

SELECTED PROJECTS

MenuMind – Autonomous AI Business Recommendation Platform

- Designed multi-agent orchestration workflows ingesting real-time weather, competitor pricing, and menu data to surface actionable restaurant recommendations.
- Built LLM reasoning pipelines with structured OpenAI outputs; implemented Redis + BullMQ for resilient background job processing.
- Developed operational insight dashboards and automated business-intelligence workflows, replacing hours of manual analysis.

Stack: Next.js · TypeScript · PostgreSQL · Redis · BullMQ · OpenAI APIs

Expedient VMS – Multi-Role Vendor Management System

- Built dashboards connecting hospitals, recruiters, vendors, and candidates with dynamic tables, advanced filters, and reporting charts.
- Integrated backend services supporting real-time status updates and automated workflow triggers.

Stack: Next.js · TypeScript · PostgreSQL

expedientvms.com

Omni Connects – Booking & Management Platform

- Developed scheduling, employee-management, and order-tracking systems with role-based dashboards for users, employees, and managers.
- Integrated transaction-safe booking APIs ensuring data consistency across concurrent sessions.

Stack: Next.js · Tailwind CSS · REST APIs

omniconnects.com

MotoArena – AI-Powered Vehicle Discovery Platform

- Built intelligent vehicle discovery with AI-assisted search, image-based filtering, and dynamic recommendation APIs.
- Optimised responsive UI for performance across devices with lazy-loaded content and efficient API calls.

Stack: Next.js · TypeScript · AI APIs

ai-moto-arena.vercel.app

EDUCATION

Bachelor of Science – Computer Systems Engineering

University of Engineering & Technology (UET) Peshawar · 2020 – 2024

ADDITIONAL INFORMATION

- 2+ years of professional full-stack development across healthcare, SaaS, and AI domains.
- Hands-on experience shipping agentic AI systems, RAG pipelines, and LLM-integrated products to production.
- Strong command of the modern JavaScript/TypeScript ecosystem; rapid learner of new frameworks and tools.
- Available for full-time remote contractor and international remote roles; fluent in English.
